## Rock-solid backup and recovery

Visor 360 Cloud Service is a reliable, cost-effective alternative to traditional backup methods, with a fully automated, agentless, online solution backing up to IMMOTEC's mirrored, secure, offsite data storage infrastructure. It provides centralized and automated backups of all your iSafePro 360 files and databases and immediate online restorations.

IMMOTEC's Visor 360 Cloud Service will ensure that your access control databases are automatically backed up to our most secure, offsite data center daily. You will never have to worry about computer hardware failures or someone accidentally deleting your data.

Our Data center was designed to be reliable, stable and secure. With a secure, climate controlled premises, fault tolerant equipment and scalable, high capacity architecture, IMMOTEC's data center is optimized for reliable transfer and safeguarding of customers iSafePro 360 access control systems databases and files.

- ➢ Risk reduction – the vulnerability to your organization caused by incomplete backups is essentially eliminated.
- ➢ IMMOTEC provides an easy-to-use interface that simplifies the backup & recovery process.
- ➢ Sophisticated data compression technology.
- ➢ Removing the tedious task of managing the backup and restore process.
- ➢ A user-definable number of backup versions of files are retained, for immediate online restore.
- ➢ Very High Security Using Advanced Encryption Standards (up to 256 AES) PLUS Hardware Authentication.
- ➢ Technology complies with the following HIPAA & SSAE-16 Audit and Cryptographic Module Validation Program FIPS requirements.
- ➢ Backup data can easily be selected and restored online without the need to locate and identify tapes.
